Microsoft has supported our Computer Users Group from the time that we started until and including NOW. We appreciate their support and feel that most other companies quit helping groups such as ours. We are ICON Users Group, located in Springfield Missouri. Microsoft comes to our group and demonstrates their newest software and generally helps our group and other groups similar to ours. I feel that they have made using computers much more user friendly than they were in the beginning. ENOUGH IS ENOUGH!! QUIT THE PERSECUTION OF MICROSOFT!

Sincerely,

Faye Patrick Newsletter Editor ICON Users Group Springfield Missouri
